Total Weed Control | Tree Maintenance | Vegetation Clearance | Fencing

Invasive Weed Eradication

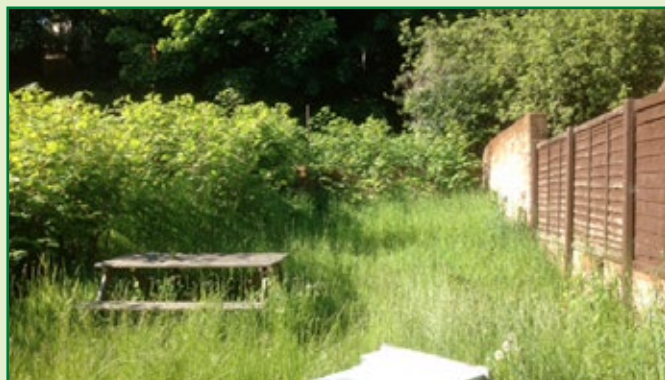

*Treating Giant Hogweed
at the Ipswich Chord Site
prior to excavation*

Encompass Environmental specialise in the eradication of invasive weeds, namely **Japanese Knotweed** and **Giant Hogweed**, also the eradication of tenacious weeds, buddleia, brambles and bracken.

Our Japanese Knotweed management plan allows sufficient time to enable treatment and monitoring over a realistic timescale in order to eradicate the knotweed. Our principal aim is to eradicate the knotweed infestation to within budget by the safe and controlled use of selected herbicides.

Our mission is to protect you and your environment.

Japanese Knotweed treatment - before and after

Testimonials

“I find the work completed by the Encompass team to be very professional and accurate first time and every time. This ensures we all keep cost to a minimum which is crucial to lowering the cost of the rail industry.”

DB Cargo

“Encompass have proven over the years to be a very competent and an easy to get on with company. It is also reassuring to see the same workers on each visit, providing the same level of service.”

Hitachi Rail Europe
